

v-Parts for EMC Documentum

Vorsite Corp., Last Updated May 2009

The Vorsite v-Parts product is a collection of SharePoint web parts that provide key integration points with the EMC Documentum enterprise content management system

Vorsite v-parts for EMC Documentum connects employees to content stored across the organization, allowing users to collaborate within the context of the business process in which they are involved, while using the familiar user interface of SharePoint.

Our technology is designed to enable collaboration and content control across back-end systems allowing companies to leverage the capabilities of their advanced enterprise content management platforms and the years of investments in processes, retention policies and compliance. Employees working in SharePoint can view content, start complex workflows and perform other activities available in your advanced enterprise content management system.

Benefits

- **Increased Productivity and “Time to Value”**

Provides even casual users with easy, personalized access to trusted content in Documentum repositories through the Microsoft SharePoint Portal, empowering users to manage and leverage content assets, which increases employees’ productivity, while simplifying administration for IT managers.

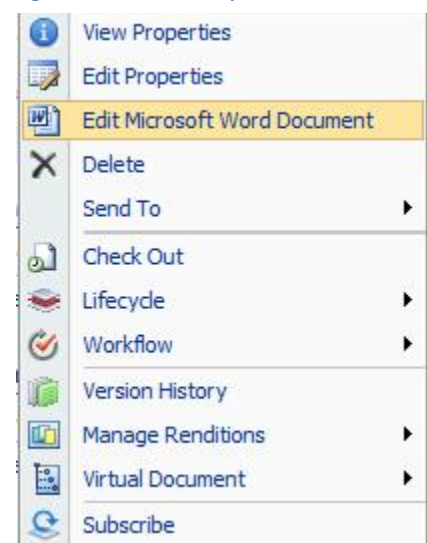

- **Better, Faster Decision-Making**

Delivers trusted content, which is actionable, streamlining workflow processes and driving faster, more informed decision-making.

- **Powerful, Easy-to-Use Unification**

Delivers access to content and data from one easy-to-use familiar portal interface, with complete integration with the Microsoft Windows desktop.
