

# VORAPPS FOR SHAREPOINT ONLINE CLOUD SERVICE

## EMAIL ENABLED INFORMATION STORAGE SOLUTION

**Saving time is key to business success** in today's ever-changing marketplace. Efficient organizations can react swiftly and respond effectively to opportunities and challenges. They utilize tools that allow information flow and real-time collaboration with co-workers and decision-makers. Yet many companies today are held back by their reliance on manual processes. Their workers still engage in searching for documents in email, resulting in lost productivity and delayed results.

vorApps for SharePoint Online delivers an **email enabled information management solution** leveraging the power of Microsoft SharePoint Online. Through simple automation, knowledge can be captured, searched, and accessed through SharePoint. Instantly your workers create an alternate secure location to shared inboxes. Whether team members are in the next room or on the next continent, the powerful combination of automation and storage drives business efficiencies and builds a more agile organization.

### Benefits

- Email enabled information storage
- Email automation
- Fax automation
- Public folder experience
- Archiving

### HOW IT WORKS

vorApps for SharePoint Online is a supplemental cloud application built on Microsoft Windows Azure and is used in conjunction with SharePoint Online. This cloud-based application leverages the power of the Microsoft Business Productivity Online Suite, which is supported by Microsoft's redundant and geographically dispersed data centers around the world. vorApps for SharePoint Online helps simplify IT management by removing the pain of manually managing information.

**Vorsite offers this convenient collaboration service** with a simple per-user monthly fee and complements the commercially available installation of Microsoft SharePoint Online.

### Key features include:

- Email Services
  - Incoming/outgoing emails are stored and accessed from familiar SharePoint lists and libraries
  - Incoming/outgoing emails are stored in Windows Azure and accessible from SharePoint Online lists and libraries
- Administration
- Reporting
